SOMETHING MORE THAN EVERY DAY PERIODONTOLOGY

The Level 3 Advanced Techniques course is an **intense three-days program** that teach periodontologists how to move beyond the everyday periodontology.

Contemporary innovative techniques and groundbreaking approaches reshape the way of periodontal disease treatments understanding.

From regenerative strategies that aim to restore lost tissues to holistic methodologies that prioritize prevention and patient-centered care Periodontology is evolving rapidly.

In this course we will walk you through some of the latest advancements in periodontology and explore how these developments are setting the stage for more effective treatments, improved outcomes and a deeper understanding of Periodontology.

Prof. Giulio Rasperini

Dr. Rasperini is Associate Professor of Dentistry and Periodontology at the Department of Biomedical, Surgical and Dental Sciences, University of Milan, Milan, Italy. Adjunct Professor and part-time Faculty at Harvard School of Dental Medicine, Boston, MA USA

Dr. Rasperini received his D.D.S. from the University of Pavia in 1990, his certificate of specialist in Orthodontics from the University of Milan in 1997, his certificate as Active Member of the Italian Society of Periodontology and Implantology (SIdP) in 1997. He later received his certificate as Active Member of the European Academy of Esthetic Dentistry (EAED) in 2009, Full member British Academy of Aesthetic Dentistry (BAAD) 2015-2022, Italian Academy of Osseointegration (IAO) in 2022, Board member of the International Academy of Periodontology (IAP) 2023-actual. Dr. Rasperini is member of the Editorial Board of the International Journal of Periodontics & Restorative Dentistry and is ad hoc reviewer in the editorial boards of multiple journals. He has published over 125 papers on PubMed, h-index 41 and more than 6000 citations. He lectured extensively in the five Continents in the fields of Periodontology and Implantology, Regenerative Medicine, Surgical techniques for periodontal and peri-implant tissues reconstruction. Winner of Awards for research with his co-workers: International Quintessence Publishing Award (Boston 2000 - 2004), Goldman Prize (SIdP 1996 - 2010 - 2017), Clinical Research Award (EAO 2010), Earl Robinson Periodontal Regeneration Award (AAP 2012), Align Research Award (2013).

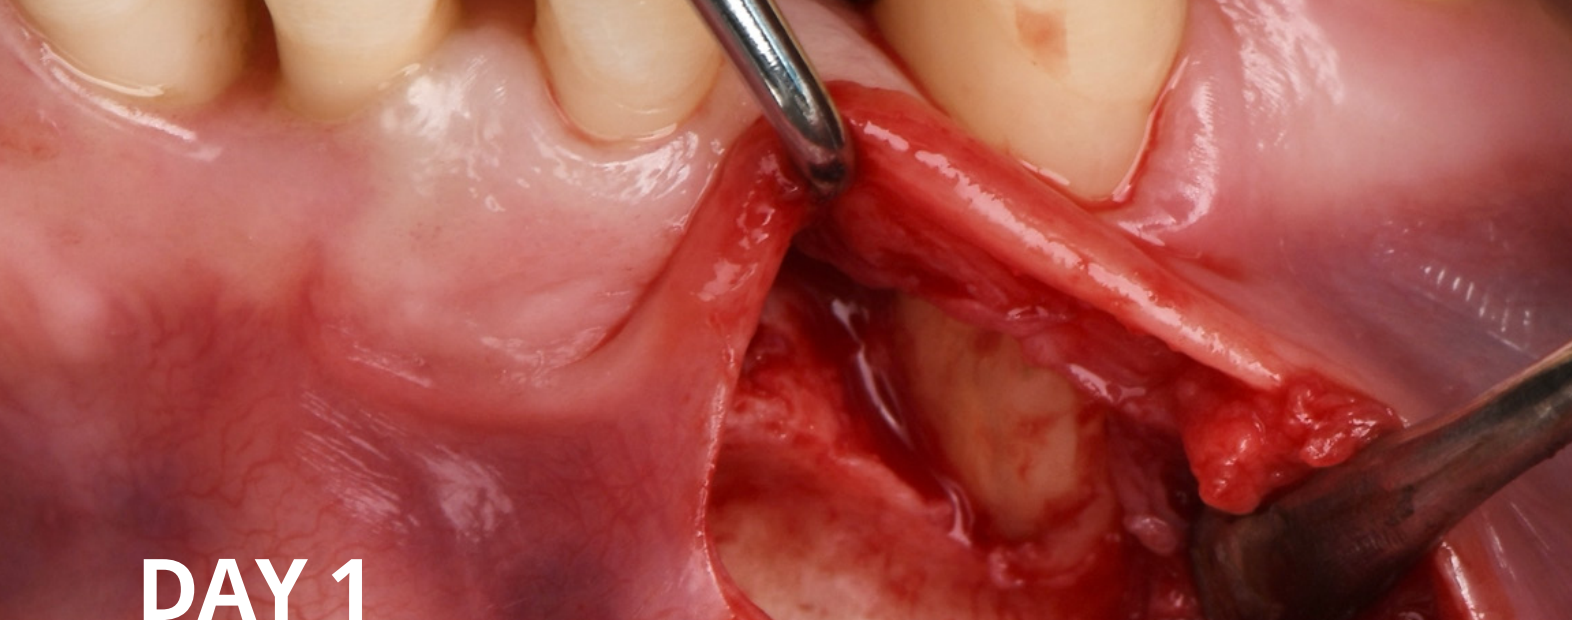

He is the founder of the iPerio Education Center in Piacenza, Italy, where he teaches his philosophy of treatment and concepts of modern dentistry.

Dr. Emilia Kazarian

D.D.S., Maxillo - Facial Surgeon. Graduated in 2009 from First State Medical University Moscow, Russia. Certified in maxillofacial surgery at Moscow State University of Medicine and Dentistry in 2012 and finished post-graduate program in Federal State Institute of Postgraduate Education, Dep. of Defense of Russian Federation. Lecturer for the University of Milan, published papers on periodontal microsurgery. Inventor of the 3D-tunneling surgical technique. Since 2019 speaker in iPerio Educational annual programs with the main topic on Periodontal Microsurgical techniques and interdental soft-tissue regeneration. High aesthetic view and artistic vision of dental photography. Private practice in Moscow, Piacenza and Milano as an oral surgeon, implantologist, periodontist, and in facial aesthetics medicine.

DAY 1

DAY 2

Prof. Giulio Rasperini

Morning

Evolution of the periodontal surgical techniques and regenerative biomaterials for soft tissue and bone regeneration.
Interproximal attachment gain.

Afternoon

Hands-on 1 Interproximal attachment regeneration with CA-EPP technique / BoneModels

Hands-on 2 Interproximal attachment regeneration with the focus on furcation involvement / BoneModels

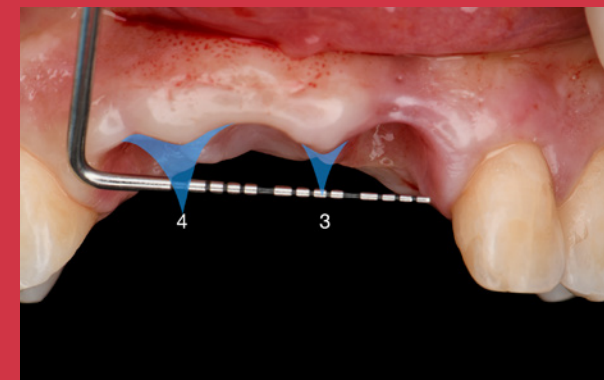

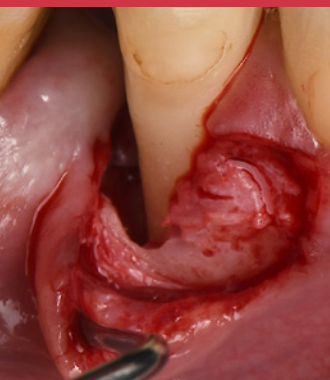

Dr. Emilia Kazarian

Morning

Live surgery

Afternoon

Decision making for the treatment of periodontal disease with the focus on interproximal attachment gain. Paradigm shift in periodontal regeneration surgical techniques for papilla reconstruction in RT2 and RT3 defects.

Morning

Theoretical part and exercises on Micro surgery

Afternoon

Hands-on 3 Interproximal attachment regeneration with 3D Tunneling technique / BoneModels

Hands-on 4 Interproximal attachment regeneration with Modified Suzuki technique / BoneModels

Learn new 3d tunneling and CA-EPP surgical techniques for periodontal regeneration and papilla reconstruction from the authors

LABOMED

Train your surgical skills on specially designed by
Dr. Kazarian and Prof. Rasperini BoneModels

Prof. Rasperini and Dr. Kazarian together with BoneModels created special models with periodontal defects of various configurations and complexities. **The participants have the opportunity to practice surgical techniques studied in the course**

REGISTRATION FEE

Early registration

€ 3.500 + VAT 22%*

Registration after May 31, 2026

€ 3.800 + VAT 22%*

Location

iPerio Education
Via XX Settembre 119
29121 Piacenza - Italy

* for EU residents Vies registered
and extra UE no VAT

By standardising your instruments with **IMS**, additional time and revenue is generated while extending the useful life of your Hu-Friedy instruments. Dental professionals state that by implementing IMS, they **save 5 to 10 minutes* per procedure allowing the staff to spend more time on value-added activities**. In addition, safer transportation of soiled instruments reduces risk of injury and exposure to blood borne pathogens.
* When compared to single instrument decontamination based on market survey results
