Mastering the Vertical Incision
Bilaminar Elevation:
Advanced soft Tissue surgery

2 DAYS
Intensive Masterclass &
Hands-On course

Dr. Bryan Po-Jan Kuo

9 - 10 April 2027

PIACENZA - ITALY

THE MASTER **DR. BRYAN PO-JAN KUO**

Dr. Po-Jan Kuo is a Clinical Assistant Instructor at the National Defense Medical Center, Taiwan. He received his DDS degree from Kaohsiung Medical University in 2009 and later completed his Certificate in Periodontology, M.S., and Ph.D. in Medical Sciences at the National Defense Medical Center. He is a Diplomate of the Taiwanese Board of Periodontology, chairperson of the committee of the Taiwan Academy of Periodontology (TAP), and also a Diplomate of the Taiwan Academy of Aesthetic Dentistry (TAAD). Dr. Kuo focuses his clinical and academic work on periodontal regeneration and the management of soft tissues. He is the creator of the Partial-Full-Thickness (PFT) tunnel technique with the Supra-Crestal Sling (SCS) suture. This innovative approach enhances clinical outcomes in root coverage and papilla reconstruction. In addition to maintaining a private practice in periodontology and implantology, Dr. Kuo actively collaborates across dental disciplines to achieve optimal esthetic and functional results.

LECTURE DATE **9 APRIL 2027**

HANDS-ON DATE **10 APRIL 2027**

LECTURE

Day 1 : 9 April

LECTURES &
INTERACTIVE
DISCUSSIONS

over the tooth prognosis and lessens the severity of the disease condition
sante, Giacinto Zucchi, Giorgio Pagani, Martina Stefanini, Hani El-
eration, J Periodontol. 2021 Jul;92(7):1021-1029

 **09:00 - 13:00**

 **14:00 - 18:00**

**Rebuilding What Matters:
Partial-Full-Thickness Tunnel and
Supra-Crestal Sling Suture for Root
Coverage and Papilla Enhancement**

Foundations & Clinical Decision-Making

- Biological Foundations for Predictable Mucogingival Surgery
- Accurate Diagnosis, Prognosis, & Risk Factor Mitigation in Recession Defects
- Evidence-Based Decision-Making Criteria & Technique Selection

Advanced Surgical Mastery: The VIBE Concept (I)

- Deep Dive: PFT Tunnel Technique & SCS Suture Innovations
- Surgical Nuances, Technical Secrets, & Managing Complex Cases

Light Lunch & Executive networking

Advanced Surgical Mastery: The VIBE Concept (II)

- Connective Tissue Grafting (CTG): Harvesting & Donor Site Protection
- Applying VIBE Principles for Papilla Reconstruction & Augmentation
- VIBE Site-Specific Applications & Surgical Nuances for Root Coverage

Advanced Surgical Mastery: The VIBE Concept (III)

- Biological Essentials & Key Principles for Predictable Periodontal Regeneration
- Identifying & Navigating Clinical Limitations in Regenerative Therapy
- Synergistic Integration: Elevating Periodontal Regeneration with the VIBE Concept

**Interactive Clinical Case Discussions & Panel Q&A
Certificate ceremony & Group Photography**

CLINICAL CASE PRESENTATION

A technique that elevates the standard of care in periodontal and mucogingival surgery.

HANDS-ON

Day 2: 10 April

HANDS_ON PROGRAM

CHOOSE YOUR WORKSHOP SESSION:

GROUP 1

MORNING 09:00 - 13:00

GROUP 2

AFTERNOON 14:00 - 18:00

Building Soft Tissue Harmony: Partial-Full-Thickness Tunneling and Supra-Crestal Sling Suture Workshop

VIBE Hands-on Masterclass

Step-by-Step Guided Practical Training
Direct Mentorship: Mastering PFT Tunneling &
SCS Suturing Techniques

This hands-on workshop embraces the spirit of continuous clinical education by introducing participants to the Partial-Full-Thickness (PFT) tunneling technique combined with the Supra-Crestal Sling (SCS) suture—a novel surgical protocol designed to advance root coverage and papilla reconstruction.

Through a structured and practical training program, clinicians will not only refine their skills in flap design, tunneling preparation, graft stabilization, and advanced suturing, but also gain deeper insight into the biological principles driving soft tissue regeneration. The workshop highlights how minimally invasive microsurgery can achieve scar-free, harmonious outcomes in the esthetic zone, transforming the most challenging areas in mucogingival surgery into a predictable clinical opportunity.

Each participant will be individually provided with:

- Hu-Friedy Tunneling and Surgical Kit by Prof Rasperini
- STOMA Micro Tunnel Kit by Prof. Kuo
- Custom models designed by the instructors
- Zeiss operating microscope
- Sutures and biomaterials

INFO:

Due to the high number of registrations, an additional hands-on session has been scheduled for **April 11.**
